ONFI Technical Errata

Errata ID	**004**
Affected Spec Ver.	**ONFI 2.0, 2.1, 2.2**
Corrected Spec Ver.	

Submission info

Name	Company	Date
Terry Grunzke	Micron	1/06/10

Number of copies of the extended parameter page is not clearly defined. This erratum defines the number of copies of the extended parameter page to be the same as the number of copies of the parameter page defined in byte 14 of the parameter page.

Description of the specification technical flaw

5.7.1.6 Byte 14: Number of parameter pages

If the target supports an extended parameter page as indicated in the Features supported field, then this field specifies the number of parameter pages present, including the original and the subsequent redundant versions. As an example, a value of 3 means that there are three parameter pages present and thus the extended parameter page starts at byte 768. The number of extended parameter pages should match the number of parameter pages.

Disposition log

1/6/2010	Erratum captured.
2/26/2010	Erratum ratified.

Technical input submitted to the ONFI Workgroup is subject to the terms of the ONFI contributor's agreement.
