ONFI Technical Errata

Errata ID	**001**
Affected Spec Ver.	**ONFI 1.0 2.0, 2.1, 2.2, 2.3, 3.0, 3.1**
Corrected Spec Ver.	

Submission info

Name	Company	Date
Terry Grunzke	Micron	08/06/12

The ball assignments for BGA-132 and BGA-152 packages have balls designated as “NU” and “NC”. The current ONFI specification does not provide definitions for “NU” and “NC”. This erratum defines “NU” and “NC”

Description of the specification change

Modify Section 2.6 as shown below:

Signal Name	Input / Output	Description
R		**Reserved** These pins shall not be connected by the host.
RFT		**Reserved for Test** These pins shall not be connected by the host.
NU		**Not Usable** A pin that is not to be used in normal applications and that may or may not have an internal connection.
NC		**No (internal) connection** A pin that has no internal connection and that can be used as a support for external wiring without disturbing the function of the device, provided that the voltage applied to this terminal (by means of wiring) does not exceed the highest supply voltage rating of the circuit.

Disposition log

08/6/2012	Erratum captured.
