

Micron in the United States

At-A-Glance

~10,000

Team members

Locations

Micron Headquarters

Boise, ID (5,700 team members)

Manufacturing

Manassas, VA (1,600 team members)

Other Locations

Allen, TX
Austin, TX
Folsom, CA
Irvine, CA
Longmont, CO
Meridian, ID
Minneapolis, MN
Novi, MI
San Diego, CA
San Jose, CA
Seattle, WA

Functions

Corporate Headquarters
Consumer Products Group
Customer Labs
Engineering and Development
Front-End Manufacturing
Memory Design
Systems Integration
Technology and Products

Leading Innovation in the United States

The country that leads in semiconductor innovation also leads in the transformative technologies that semiconductors enable, from artificial intelligence to autonomous driving.

As the only U.S.-based DRAM manufacturer, Micron has 13 sites located across the United States, many of which are growing.

Boise, Idaho, is where we were founded over 40 years ago and maintains our corporate headquarters. The Boise campus is also home to Micron's recently expanded Research and Development Center of Excellence. This cleanroom expansion, along with a new building to support engineering and technology development, is critical for developing Micron's advanced technologies.

Manassas, Virginia, is the location of our Long-Lifecycle Products Center of Excellence. Micron recently broke ground on a 100,000-square-foot expansion of this fabrication facility. With its first wafers coming out around the end of 2021, this facility is designed to meet the growing needs of the automotive, industrial and networking customers and markets.

Supporting Our Global Communities

Maintaining a successful global footprint includes a dedication to sustainable manufacturing practices and a commitment to supporting the communities where our team members work and live. We consistently look for new ways to reduce our impact on the environment in a range of areas including water management, energy efficiency, and recycling. Through the Micron Foundation, we promote science and engineering education to children around the world and address basic human needs through our grants, programs, and volunteer efforts.
