

# Accelerating Sustainability

## Aspirational Goals

### Climate

Energy, including our energy efficiency and purchase of renewable energy

**100%**  
Renewable energy where available

Emissions from our facilities, particularly focused on reducing greenhouse gases

**40%**  
Reduction in our greenhouse gases from 2018

### Water

Water restoration through efficiency, water recycling, and other means of restoring water to local watersheds

**100%**  
Water conservation through efficiency, reuse, and restoration

### Waste

Waste reduction through materials efficiency and other steps to eliminate our waste to landfill

**Zero**  
Waste to landfill through reduction, reuse, and recycling
